

One main mistake on the rules (both English and German) is about the end of game condition

1. At the beginning of Phase 1 the number of cards in the building deck are less than:
 - 12 in a 3 players game
 - 16 in a 4 players game
 - 20 in a 5 players game

In this case it starts the last turn of the game with some changes:

- Phase 1 is skipped
- In Phase 2, instead of playing cards from your hand, draw cards from the building deck to auction (6 cards for 3 players, 8 cards for 4 players, 10 cards for 5 players). If there are not enough cards in the building deck, draw all remaining cards.

The mistake is on skipping phase 1. This is wrong. Players have to avoid to draw cards from the deck but they STILL take Money from the bank.

In the English rules in the VP about the Building Card:

2 VPs for each Building Card of the color which you have the least number of cards. Both face up and face down Building Cards are used

This can be interpreted in different way. The right way to score points is as follow.

2 VP for each set of 5 Building Card of different color he has on his playing area (can be both face down or face up). This means that for each set of 1 Red, 1 Green, 1 Yellow, 1 White and 1 Blue Building Card he gains 2 VP

Example 1.

A player has:

0 blue cards
4 green cards
3 yellow cards
3 white cards
6 red cards

VPs are 0 VPs because there is not a complete set of cards.

Example 2.

A player has:

3 blue cards
4 green cards
3 yellow cards
3 white cards
6 red cards

VPs are 3 (the minor number) x 2 VPs = 6 VPs
